Instalación / Installation / Installation

[img.1]

[img.2]

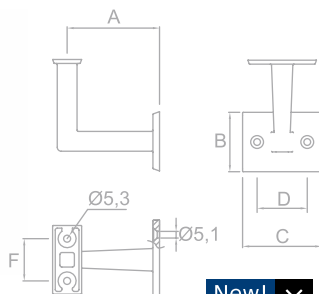

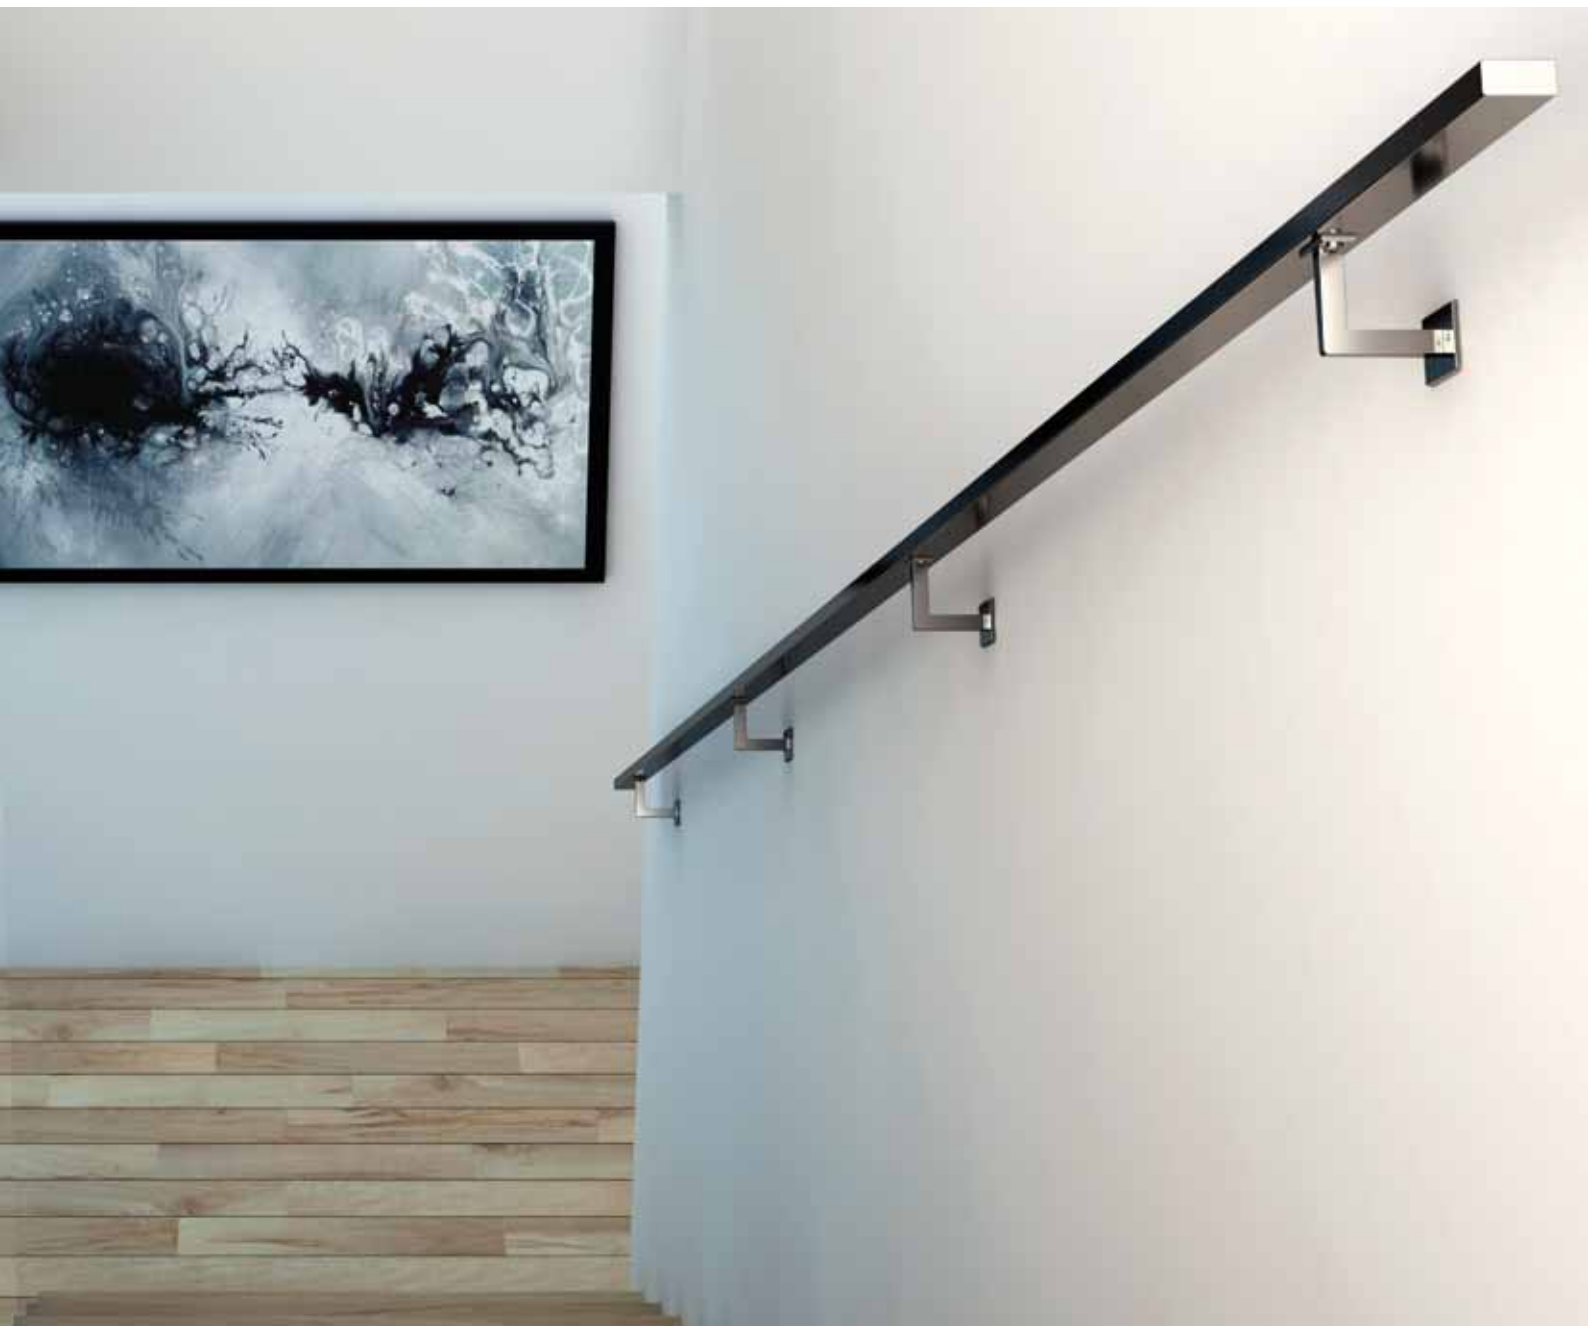

[img.3]

Ofrecer soluciones prácticas y eficaces al profesional en la instalación es el principio de trabajo del departamento de innovación de Comenza para el desarrollo de sus accesorios.

El soporte está diseñado para posibilitar su fijación en un solo tiempo usando tacos premontados. Una vez finalizado el montaje y asegurado el soporte sobre la superficie de apoyo, se fija el embellecedor ejerciendo una pequeña presión sobre la base, quedando la goma oculta en su interior. [ img.1 ]

Pasos de instalación con ST-353:

1. Taladrado de la pared
2. Colocación de pieza
3. Fijar el soporte a la pared con el taco premontado [ img.2 ]

Pasos de instalación en soportes convencionales:

1. Taladrado de la pared
2. Colocación del tirafondo
3. Colocación de la pieza
4. Fijar el soporte [ img.3 ]

[ENG]

Offering practical and effective solutions to professional installation is the key goal of Comenza's innovation department for the development of its accessories.

This product has been designed to enable its fixing at once using nylon hammer drive anchor. Once the assembly is finished and the support is fastened on the support surface, the cover is placed pressing slightly on the base, and the rubber rests hidden inside. [ img.1 ]

Installation steps with ST-353:

1. Drill the wall.
2. Place the ST-353.
3. Fix the support to the wall with the preassembled anchor. [ img.2 ]

Installation steps with traditional supports:

1. Drill the wall.
2. Place the lag bolt.
3. Fix the piece.
4. Fix the support. [ img.3 ]

[FRA]

Offrir des solutions pratiques et efficaces au professionnel en matière d'installation, voici le point de départ du travail du Département d'innovation de Comenza pour le développement de ses accessoires.

Ce support a été conçu pour faire possible la fixation d'un coup d'ancrages pré-assemblés du type de cheville en plastique. Quand le montage est fini et le support bien fixé à la surface d'appui, on fixe l'enjoliveur en exerçant une petite pression sur la base, en restant la caoutchouc torique cache dans l'intérieur. [ img.1 ]

Installation avec le support ST-353:

1. On perce le mur.
2. On place la ST-353
3. On fixe le support au mur avec l'ancrage pré-assemblé. [ img.2 ]

Installation avec un support traditionnel:

1. On perce le mur.
2. On place la vis tire-fond.
3. On place la pièce.
4. On fixe le support. [ img.3 ]
