Instalación / Installation / Installation

Instalación TF-507

Se coloca la pieza en el margen final del tubo y con un golpe seco de un martillo de nylon o goma se introduce en el interior del tubo. [img.2]

La tapa queda perfectamente fijada al tubo. [img.3]

[img.1]

TF-507 Installation

Place the piece in the far end of the tube and use a nylon or rubber hammer to introduce it inside the tube. [img.2]

The end cap will be perfectly fixed to the tube. [img.3]

[img.2]

TF-507 Installation

La pièce est posée sur le rebord final du tube. En donnant un coup de marteau en nylon ou en plastique, elle s'enfonce dans le tube. [img.2]

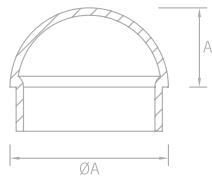

L'embout restera ainsi parfaitement fixé au tube. [img.3]

[img.3]

Instalación / Installation / Installation

El novedoso sistema de fijación anti-vibración, consigue a través de gomas ubicadas en el interior, un doble efecto:

- Absorber las vibraciones producidas por el uso.
- Mejorar la estética gracias a la eliminación de los tornillos de apriete

[ENG]

The innovative anti-vibration locking system achieves a twofold effect through the rubbers located inside:

- Absorbs vibrations caused by the use
- Improves aesthetics by removing the tightening screws

[FRA]

Grâce au gommages intérieures, le nouveau système de fixation antivibration a un double effet:

- Il absorbe les vibrations produites à cause de l'usage
- Il améliore l'esthétique en supprimant les vis de serrage
